Comment

This a supplement to the comments previously submitted by me for Utah Public Lands Alliance.

There are missing routes in the inventory. I did a brief high level review of the TMA area and quickly found 9 routes that are missing from the inventory using satellite imagery. Further ground proofing is necessary to determine other routes.

Other observations are that County, state, and RS 2477 claimed roads do not seem to be designated in the TMP inventory separately. These should all be called out separately. County and State roads are not under the control of BLM in the Travel Management Planning, and RS 2477 claimed routes should be separately identified in the inventory so that when adjudication is complete, they may be added to the inventory as an addendum.

Pdfs are attached to show the locations, a kmz file is available to show precise locations by contacting the submitter.
